

Teamtailor

THT integration

1. Introduction of your company/software

THT is an expert in predicting human behavior. It is a multinational company with a presence in more than 13 countries and over 18 years of experience in methodologies to discover people's zone of genius. During this time, THT has developed the Color method with 300 tools for selecting, developing, and aligning personnel in organizations, positioning itself at the top of human talent firms. They have worked with more than 12,000 executives with disorders and assessed over 3 million individuals in more than 1,700 organizations.

2. How to enable the integration

Getting started

First things first, to enable this integration you must have an agreement with THT so start by reaching out to your contact person at THT. Afterwards, the technology team of THT will provide company access credentials to use the integration (clientId, clientSecret, companyId). We will then unlock the integration!

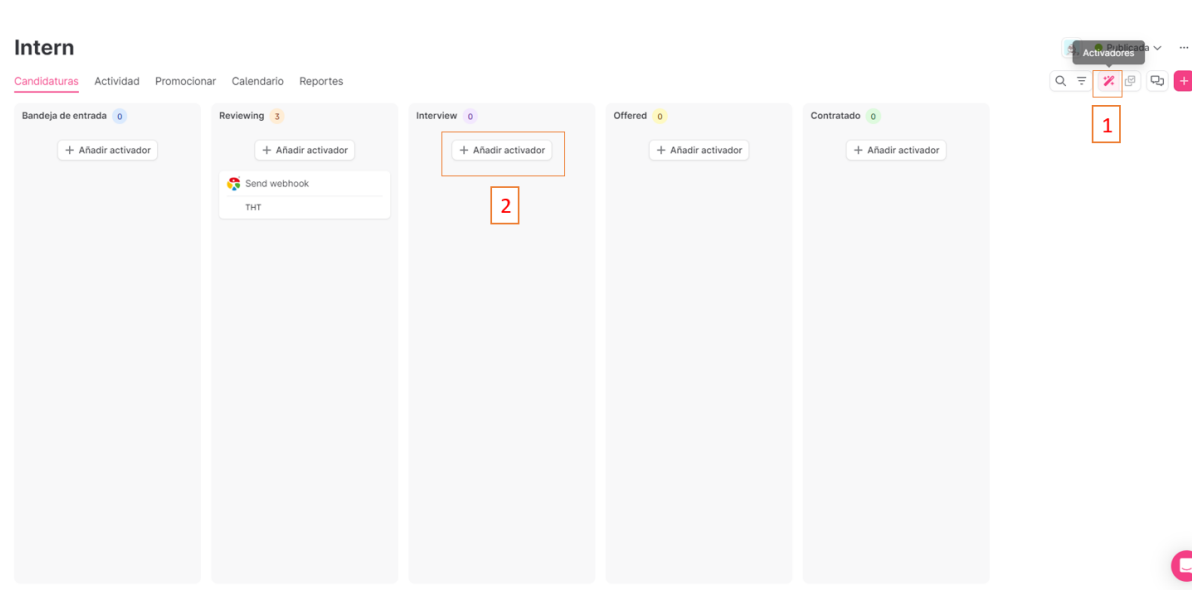

Set up workflow in Teamtailor

To use THT integration, the first step is to add an THT trigger to your recruitment process in Teamtailor. This means the test is automatically sent to the candidate the first time the candidate is moved in to this stage.

3. Details regarding the integration

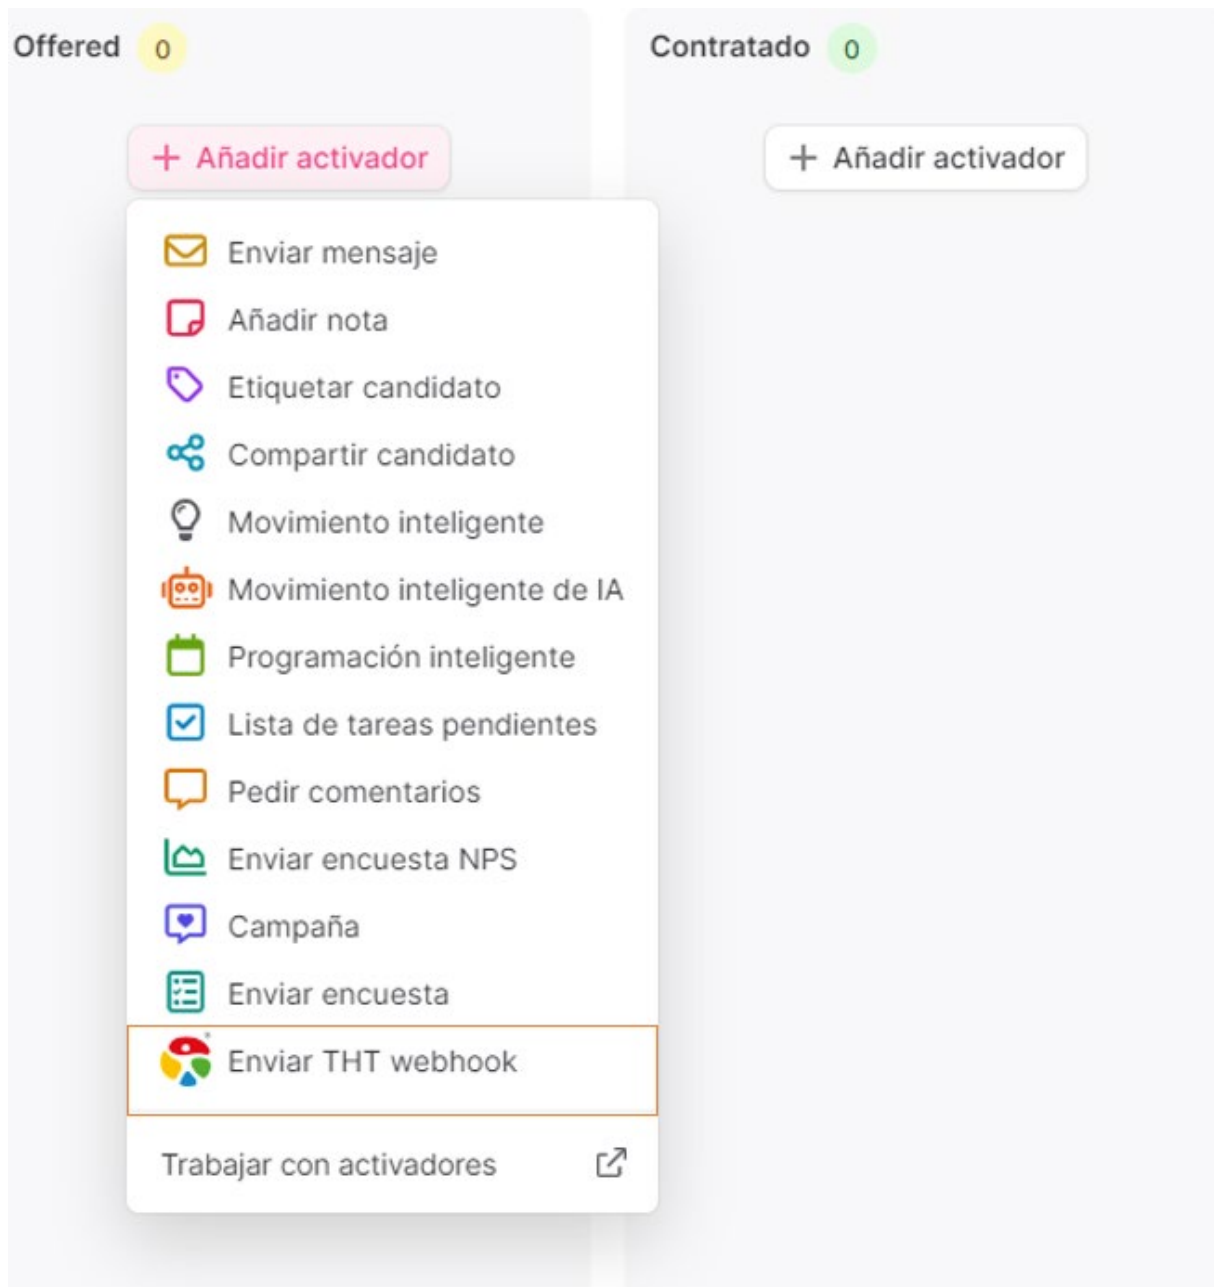

Configure Triggers on Job positions on Teamtailor

Head over to one of your jobs on Teamtailor. From the applications view, you should click on **Triggers (1)**.

(1) Select the stage that you want users to receive the assessments and add the trigger by clicking the **+** **(2)**. Candidates that are moved in to this stage will get the invite for the assessments. You can either use the assessments on the Inbox, so all candidates are automatically sent the assessments, or a special stage that you move candidates to.

Select THT Webhook

Select the type of questionnaire you want to activate in the stage. (Note: If you choose a Competencies test, it's necessary to select which competence you want to evaluate; otherwise, the test won't be activated).

Enviar webhook

Cada vez que traslades un candidato de la etapa *Offered*, ha enviado el candidato a THT.

Cuestionario*

Cancelar Añadir activador

Review candidate's result

Once the candidate completes the test, Teamtailor will be notified that the test has been finished, and they will be able to download the PDF file containing the basic test report. (Note: If the recruiter wants more information about the test, they should contact THT).

THT

Webhook

Estado: Completado ⋮

Resumen: finished test, you can download the results within 10 days

Test results

Important:

- These results can be downloaded within a period of 10 days.
- The process of sending the results will incur a charge within the THT platform. For this reason, if the user does not have enough talents (THT's charging currency), they will not be able to download the test results and will need to get in touch with a THT advisor, This is the message if the user does not have enough talents (THT's currency) to download the results.
